

Chemistry Associate

Mewburn Ellis is the forward-looking IP firm. We work with organisations building the brands and technology that will define tomorrow. Our Chemistry team are currently looking for fully or part qualified patent attorneys to join their established practice.

Role

We are looking for fully or part qualified patent attorneys to join our Chemistry team. The team is currently spread across our four UK offices in London, Bristol, Manchester and Cambridge and we would consider candidates for any of these locations.

Our new associates are central to the success of our firm and the delivery of our growth plans. We will value your ideas and opinions and know that you can help us in our drive for continued improvement. Associates at Mewburn Ellis are not put in the back office. You will be a fundamental part of our enhanced service offering achieved through our new 'Ways of Working' programme and will be working directly with our existing and future clients. We expect you to be talking to them and building and developing your own relationships.

Essential skills

- At least two years' experience working in the IP profession
- Strong academic background in Chemistry
- Successfully passed either the Foundation exams or PG Certificate in IP Law

Desirable skills

- Confident and sociable manner with excellent people skills
- Ability to hit the ground running
- Able to deal with clients directly
- Able to handle client drafting, prosecution and advice
- Experience of or interest in opposition work would be valuable

We offer

- A generous financial package
- Diverse and exciting clients to work with
- A supportive but relaxed environment
- The possibility to work abroad
- Comprehensive training and development
- A flexible approach to working hours
- A friendly and social place to work
- A diverse, inclusive and responsible environment
